WORK EXPERIENCE

Apprenticeship
Major League Hacking
07/2021 - 08/2021
Combining the Strategy and the technology to develop software

Achievements/Tasks

- During my apprenticeship with Major League Hacking, I had the opportunity to develop a chat-based software for a hackathon. This immersive experience allowed me to gain practical knowledge and hands-on experience in implementing TCP/IP protocols.
- Additionally, I actively contributed to several projects leveraging technologies such as HTML5, JavaScript, CSS3, API integration, and version control using GIT.

Open Source Contribution
Devstrons'
02/2022 - Present
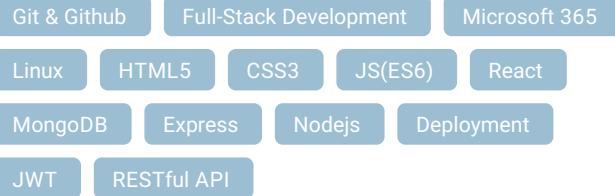

Achievements/Tasks

- During my time at Devstrons, I significantly improved the accessibility of our open-source projects by updating their documentation. Through this effort, I promoted knowledge-sharing within and beyond the Devstrons community by documenting best practices and valuable tips.
- One notable contribution includes the documentation update for Issue #76 , where I implemented improvements that have positively impacted the usability and understanding of the project's functionalities.
- https://github.com/devstrons/heloworld/issues/76.

TECHNICAL SKILLS

`Git & Github`　`Full-Stack Development`　`Microsoft 365`
`Linux`　`HTML5`　`CSS3`　`JS(ES6)`　`React`
`MongoDB`　`Express`　`Nodejs`　`Deployment`
`JWT`　`RESTful API`

PERSONAL PROJECTS

PORTFOLIO WEBSITE (02/2022)
- Designed and developed a responsive portfolio website to showcase my projects, skills, and achievements in an accessible and user-friendly manner. Leveraging modern web technologies including HTML, CSS, and JavaScript, I ensured that the website is optimized for various devices and screen sizes.
- WORKING LINK

FULL STACK TO-DO APP (04/2023)
- The app developed is composed of four technologies: MongoDB, Express.js, React.js, and Node.js.
- The application allows users to create new tasks, mark tasks as complete, and delete tasks.The application also includes user authentication, which ensures that only authorized users can access their tasks.
- WORKING LINK.

TESTIMONIALS-WEBSITE (03/2023)
- The testimonial website is developed using React is an excellent tool for showcasing customer reviews in a visually appealing and organized way.
- Implemented concepts of Html,Css,Javascript, React, Git and Deployed using Netlify.
- WORKING-LINK. ↗

FULL STACK FOOD-DELIVERY APP (02/2024)
- he app developed is composed of four technologies: MongoDB, Express.js, React.js, and Node.js.
- The application allows users to create an account, add food items to cart, and delete added cart items.The application also includes user authentication, which ensures that only authorized users can access the app.
- WORKING-LINK.
